Terms of the Internship Offer

Position Offered	Web Development Intern
Offer Date	30th July, 2026
Duration	1 Month — 1st August 2026 to 31st August 2026
Nature of Program	Intended solely for educational purposes; does not constitute an offer of employment
Intern Obligations	Adherence to all company policies and guidelines applicable to non-employee interns

Tasks Completed During the Internship

As a Web Development Intern, Vaibhav completed three hands-on tasks assigned by Prodigy InfoTech, each built using HTML, CSS, and JavaScript.

Task 01

Responsive Loading Page

Interactive, fixed-position navigation menu with scroll- and hover-based style changes.

Task 02

Stopwatch Web Application

Start, pause, reset, and lap-time tracking, built for accurate interval measurement.

Task 03

Tic Tac Toe Web Application

Two-player game with click handling, game-state tracking, and win-condition checks.

Interactive Navigation Menu

Built with HTML, CSS & JavaScript

Created a fixed-position navigation menu, visible across all pages, that responds to user interaction — changing style on scroll and on hover.

KEY FEATURES

- HTML used to structure the navigation menu
- CSS used to style the menu and keep it fixed in position across the page
- JavaScript used to change background color and font color on scroll
- JavaScript used to change menu-item style on hover for interactivity

Stopwatch Web Application

Built with HTML, CSS & JavaScript

Built an interactive, user-friendly stopwatch that accurately measures and records time intervals.

KEY FEATURES

- HTML used to structure the stopwatch interface
- JavaScript functions implemented to start, pause, and reset the stopwatch
- Lap-time tracking added to record and display individual intervals
- CSS used to style the display for clear, accurate time reading

Tic Tac Toe Web Application

Built with HTML, CSS & JavaScript

Built an interactive two-player Tic Tac Toe game, aiming to get three markers in a row to win.

KEY FEATURES

- HTML & CSS used to structure and style the game board
- JavaScript functions implemented to handle user clicks on the board
- Game-state tracking added to record each player's moves
- Win-condition checks implemented to detect a completed row, column, or diagonal

EXPECTED OUTCOMES

Skills & Learnings Gained

1

Structuring web pages and UI components using semantic HTML

2

Styling fixed-position, responsive elements with CSS

3

Handling scroll and hover events with JavaScript for interactive UI

4

Using JavaScript timing functions to build accurate start / pause / reset logic

5

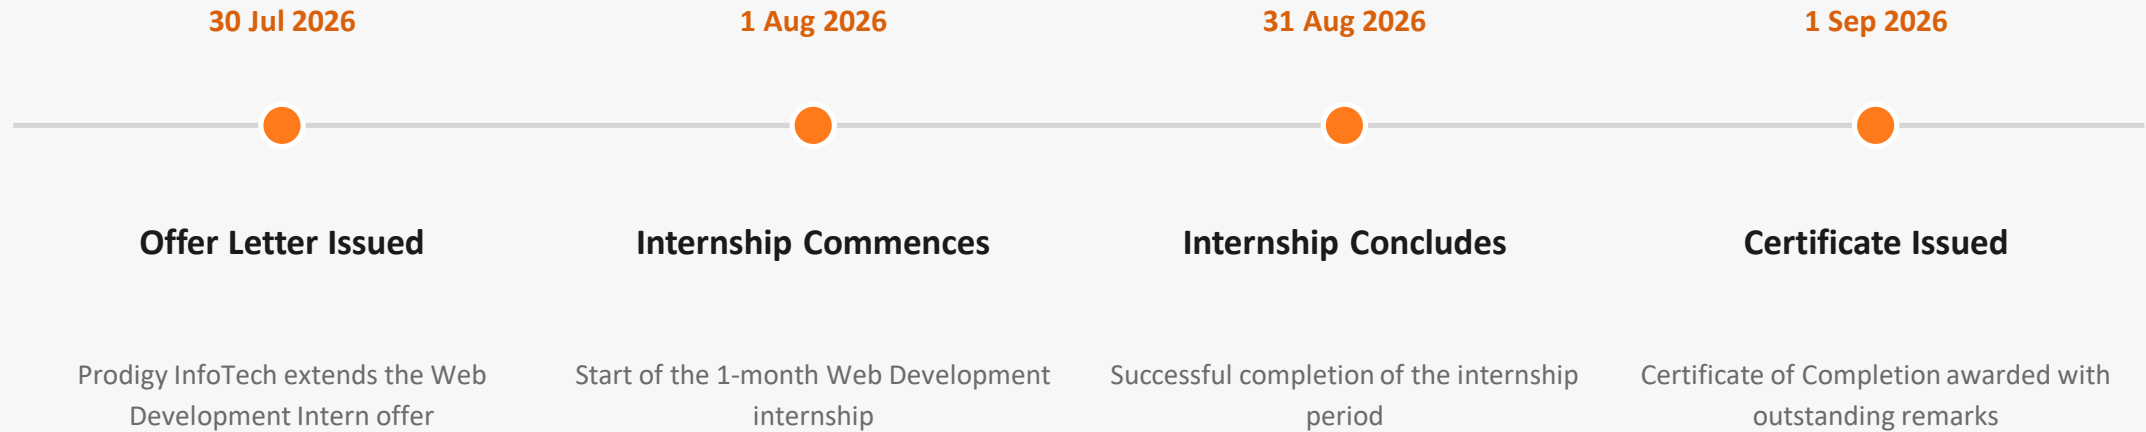

Tracking and displaying dynamic state, such as lap times and game moves

6

Implementing click-based event handling and win-condition logic for a game

TIMELINE
